

## "ARTFARM P2"

Since 2013, when we bought 1300 m<sup>2</sup> of land and small stone house, **Artfarm P2** has been our international project combining art, activism and organic agriculture on the Croatian island of Hvar.

It is situated in the Stari Grad Plain (in Greek: Hora, in Roman: Ager), a UNESCO protected agricultural area, close (2km) to the fisherman village and the beaches of Vrboska.

### [WHERE TO FIND US ON THE MAP](#)

Our main art activity is the **"visiting artist"** programme, where invited artist come to Artfarm P2, and **interact** with the **physical** and **social** environment.

Our organic **garden** and **orchard** produces vegetables and fruit during the whole season.

We enjoy a special position on the island, as we are the only place introducing and promoting the alternative culture and at the same time staying out of the tourist industry (we are NGO).

In 2017 we established the **"1010 Festival"**.

We organize private public events:  
book readings, acoustic concerts, "megaphone"  
lectures, performances debates, TRX training...  
with a intimate audience combining local and  
foreign visitors.
